Curriculum

Aim

The programme aims to educate IT managers and professionals who possess technical and management knowledge for designing, developing and managing IT systems. It provides a transformational experience in integrating the technological and managerial sides of IT. On completion of this programme, students should be able to achieve the following programme intended learning outcomes:

1. Explain the core technical and management concepts and apply these concepts in an integrated manner for IT management.
2. Explain and apply the current methodologies in some selected areas in IT management (such as IT enterprise management, knowledge and information management, Internet and web technologies, and business analytics).
3. Identify business needs and explain the process of transforming business needs into IT systems.

Programme Characteristics

- The M.Sc. programme focuses on **IT Management.** Students will acquire a transformational experience in **integrating the technological and managerial sides of IT.**
- Students will learn the **state-of-the-art methodologies** in hot areas of IT Management (namely, IT Enterprise Management, Knowledge and Information Management, Internet and Web Technologies, and Business Analytics).

Programme Structure & Courses

Each student is required to complete 29 units as follows:

→ **14 units of core courses**

Each student must complete six core courses which cover the foundations of IT and management. However, if she/he has a Bachelor's degree in IT or closely related fields or has taken equivalent courses, she/he must substitute the core course "Internet Computing and Programming" by an elective course.

→ **15 units of elective courses**

The elective courses are divided into four streams and MSc Project & Research:

• Stream 1 − IT Enterprise Management

• Stream 2 − Knowledge and Information Management

• Stream 3 − Internet and Web Technologies

• Stream 4 − Business Analytics

• MSc Project & Research

Each student is required to select at least three streams among the four streams and successfully complete at least one course in each selected stream.

The courses are listed as follows. The courses offered in each year depend on enrollment and staff availability.

	unit(s)	unit(s)
Core Courses		**14**
Artificial Intelligence for Digital Transformation	3	
Business Data Analytics	3	
Internet Computing and Programming	3	
Foundations of Management in the IT Context	3	
IT Forum	1	
IT Project Skills	1	
Elective Courses		**15**
Stream 1 – IT Enterprise Management		
Financial Technology Management	3	
Digital Marketing and Analytics	3	
Digital Experience Design	3	
IT Management: Principles and Practice	3	
IT Project Management	3	
Information System Auditing	3	
Electronic Transformation in Business	3	
Special Topics in IT Management	3	
IT Innovation Management and Entrepreneurship	3	
E-Business Strategies	3	
Stream 2 – Knowledge and Information Management		
Big Data Management	3	
Database Systems and Administration	3	
Data Mining and Knowledge Discovery	3	
Special Topics in Knowledge and Information Management	3	
Business Intelligence	3	
Prompt Engineering for Generative AI	3	
Stream 3 – Internet and Web Technologies		
Internet and World Wide Web	3	
Special Topics in Internet and Web Technologies	3	
Information Security Management	3	
Cloud Computing	3	
Dynamic Web & Mobile Programming	3	

Stream 4 - Business Analytics	
Data Mining and Knowledge Discovery	3
Special Topics in Business Analytics	3
Analytic Models in IT Management	3
Business Intelligence	3
Visual Analytics and Decision Support	3
MSc Project & Research	
M.Sc. Project	3
M.Sc. Research I	3
M.Sc. Research II	3
	29

Remarks: There may be minor revisions to the curriculum.

Duration & Schedule

The programme is offered in both one-year full-time mode and two-year part-time mode. Most classes are conducted on weekday nights at 6:30-9:20pm while a few classes, assessment activities and make-up classes may be conducted on Saturday daytime. In this manner, both full-time and part-time students can attend these classes/activities.

For full-time study, the normal study schedule is as follows:

	Semester 1 (units)	Semester 2 (units)
First Year		
Artificial Intelligence for Digital Transformation	3	
Business Data Analytics	3	
Internet Computing and Programming (or an elective course for those with relevant background as decided by the Programme Team)	3	
Foundations of Management in the IT Context	3	
IT Project Skills	1	
IT Forum		1
Elective Courses		15

For part-time study, the normal study schedule is as follows:

	Semester 1 (units)	Semester 2 (units)
First Year		
Business Data Analytics	3	
Foundations of Management in the IT Context	3	
IT Project Skills	1	
Elective Courses		9
Second Year		
Artificial Intelligence for Digital Transformation	3	
Internet Computing and Programming (or an elective course for those with relevant background as decided by the Programme Team)	3	
IT Forum		1
Elective Courses		6

Medium of Instruction

The medium of instruction is **English**. All teaching and learning materials are in English.
